I Type Stuttgart manual press Format 13^{3/4}" x 17^{5/16}"

A very carefully and accurately made small-format proofing press for composing rooms.

Print conditions equivalent to those on high-speed presses. Strong fixed printing bed.

Bed and bearers are ground. Helically toothed racks.

Side guideways with interchangeable hardened and ground steel rails.

Impression cylinder with cast-in continuous steel shaft.

High cylinder tensioning, fingertip ease of movement.

Accurate sheet feeder and gripper equipment with micrometer adjustment.

Blanket is easily changed.

Travelling delivery.

Micrometer side lays in steel rail marked off in cm or inch divisions.

Sheets are smoothed by two adjustable rotary brushes.

Highly accurate register.

Inking unit with 2 forme-inking rollers and 1 spreading roller.

Ink is spread by operation of a small hand crank.

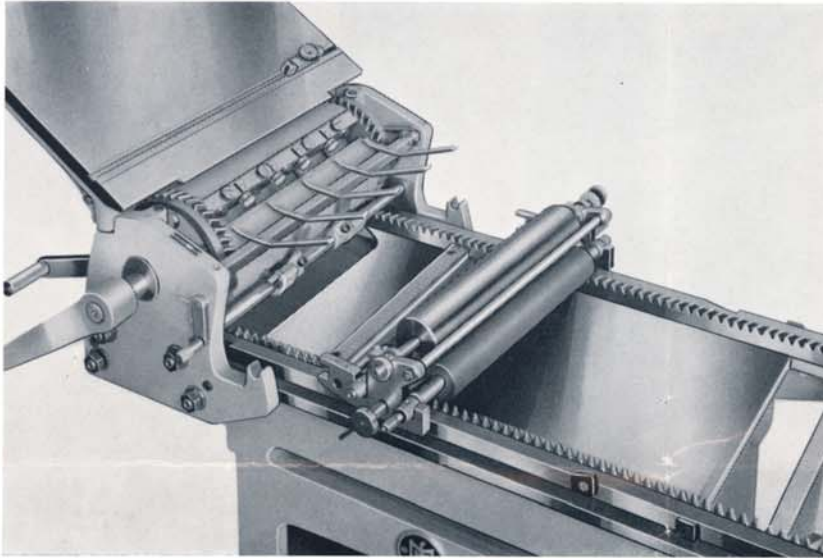

The inking unit is easy to take out. Inking table to increase inking capacity.

The ink table can be hung below the machine when not in use.

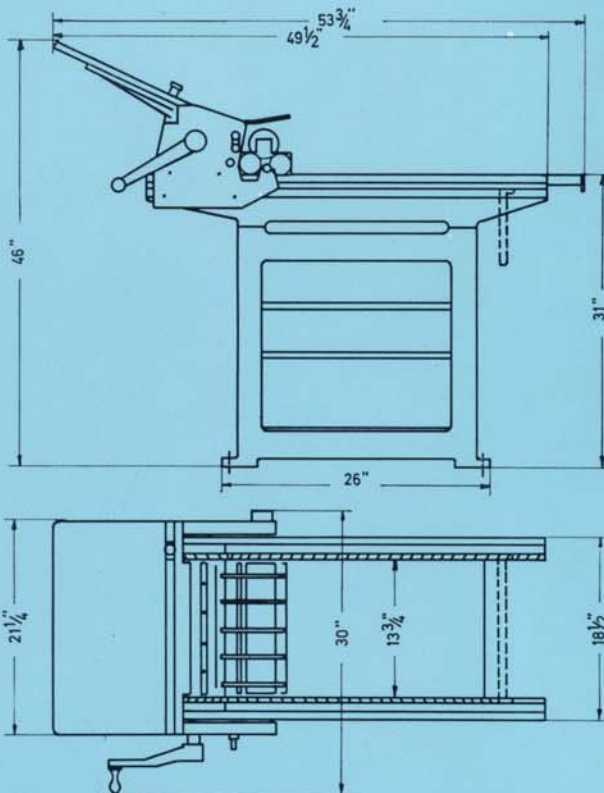

Distance between racks: 35 cm.

Impression cylinder at end of run

Inking unit disengaged

Leading dimension
