

This dolly is made from 3/4" plywood and with 3" swivel casters. The gray areas show the location of the back feet of a Vandercook Universal I. The cutout is to accomodate the toe of a toe jack.

This dolly is made from 3/4" plywood and with 3" swivel casters. The cutout is to accommodate the toe of a toe jack, and the front foot of a Vandercook Universal I, shown in dark gray, so the bottom of the frame, shown in lighter gray, will rest on the dolly. The foot is slightly thicker than 3/4", so some shims may be required on the 7x12" piece.
